## Summary

I am a Front-End Web Developer who enjoys creating modern and responsive websites using React.js, JavaScript, and Tailwind CSS. I completed the CS50 programming basics course from Harvard University, which gave me a strong start in coding. I am now improving my skills in front-end development and working on my English to better communicate and grow in my career.

## Education

**Higher Institute For Specific Studies**                    **Sep 2021 – May 2025**
*Bachelor of Management Information Systems*                    *Giza, Egypt*

## Experience

**Freelance**                    **May 2024 – Pressent**
*Front-End Web Developer*                    *Giza, Egypt*

- Developed a full freelance marketplace for Enalah Management Company, including an admin dashboard, role-based permissions, automated dispute handling, email verification and PayTabs payment/payout integration.
- Built "AI Tools Hub" by integrating multiple AI APIs (AssemblyAI, RapidAPI, Google Gemini) to deliver tools like transcription, content generation, keyword research, invoice creation, and CV building.
- Integrated APIs such as NYT Books API (E-commerce Project) and OpenWeatherMap for dynamic real-time data.
- Integrated React Hook Form in the Contact page for efficient and validated form handling.
- Implemented state management with Redux and Context API for scalable components.
- Focused on accessibility, cross-browser compatibility, SEO, Best Practices and performance optimization.

## Projects

**Marketplace** | *React.js, Node.js, Firebase (Authentication, Firestore, Storage), PayTabs, Tailwindcss*          **December 2025**

- Built a marketplace platform with an admin dashboard, permission system, automated dispute handling, email verification and PayTabs payment/payout integration.

Live Demo

**AI Tools Hub** | *React.js, Tailwindcss, Firebase, AssemblyAI API, RapidAPI, Google Gemini AI*          **November 2025**

- Developed a comprehensive suite of productivity tools powered by AI, including audio-to-text transcription, AI content generation, keyword research, invoice generator, and CV builder.
- Integrated multiple AI APIs to deliver accurate and automated workflows within a single unified interface.

Live Demo

**NYT Books E-Commerce** | *React.js, Tailwindcss, API Integration, React Hook Form, Context API*          **October 2025**

- A modern e-commerce website for browsing and buying books from The New York Times Best Sellers.
- Built with React.js, Tailwind CSS, Framer Motion and React Hook Form for Contact Page.
- Supports Dark Mode and real-time data from the NYT Books API.

Live Demo    —    GitHub Repo

**Employee Management System** | *React.js, Tailwindcss, Firebase (Authentication, Firestore, Storage)*          **September 2025**

- A comprehensive employee management system with real-time updates, role-based access control, and beautiful UI.

Live Demo    —    GitHub Repo

## Technical Skills

**Languages**: JavaScript (ES6+), HTML5, CSS3          **Styling & UI**: Tailwindcss, Framer Motion, Responsive Web Design
**State Management**: Redux, Context API          **API Integration**: Restful APIs, Axios
**Frameworks & Libraries**: React.js, React Hooks, React Router, React Hook Form, Material UI, Shadcn UI, i18n
**Tools & Version Control**: Git, GitHub, CMD, Postman
**Methodologies & Practices**: Performance Optimization, Cross-Browser Compatibility, UI/UX Principles

## Language Skills

**Arabic**: (Native Or Bilingual Proficiency)          **English**: (Professional Working Proficiency)
