Summary

I am a Front-End Web Developer who enjoys creating modern and responsive websites using React.js, JavaScript, and Tailwind CSS. I completed the CS50 programming basics course from Harvard University, which gave me a strong start in coding. I am now improving my skills in front-end development and working on my English to better communicate and grow in my career.

Education

Higher Institute For Specific Studies   **Sep 2021 – May 2025**
Bachelor of Management Information Systems   *Giza, Egypt*

Experience

Freelancer   **May 2023 – Present**
Front End Developer   *Giza, Egypt*

- Developed and deployed multiple interactive web applications using React.js, Tailwind CSS, and JavaScript.
- Built and optimized responsive UIs with smooth animations using Framer Motion and CSS transitions.
- Integrated APIs such as NYT Books API and OpenWeatherMap for dynamic real-time data.
- Integrated React Hook Form in the Contact page for efficient and validated form handling.
- Implemented state management with Redux and Context API for scalable components.
- Designed and maintained code using Git and GitHub, following version control best practices.
- Focused on accessibility, cross-browser compatibility, and performance optimization.

Projects

AI Tools Hub | *React.js, Tailwindcss, Firebase, AssemblyAI API, RapidAPI, Google Gemini AI*   **November 2025**

- Developed a comprehensive suite of productivity tools powered by AI, including audio-to-text transcription, AI content generation, keyword research, invoice generator, and CV builder.
- Integrated multiple AI APIs to deliver accurate and automated workflows within a single unified interface.
- Live Demo

Employee Management System | *React.js, Tailwindcss, Firebase (Authentication, Firestore, Storage)*   **October 2025**

- A comprehensive employee management system with real-time updates, role-based access control, and beautiful UI.
- Live Demo   —   GitHub Repo

NYT Books E-Commerce | *React.js, Tailwindcss, API Integration, React Hook Form, Context API*   **Septemper 2025**

- A modern e-commerce website for browsing and buying books from The New York Times Best Sellers.
- Built with React.js, Tailwind CSS, Framer Motion and React Hook Form for Contact Page.
- Supports Dark Mode and real-time data from the NYT Books API.
- Live Demo   —   GitHub Repo

Inventory Management System | *React.js, Tailwindcss, Firebase (Authentication, Firestore, Storage)*   **August 2025**

- Responsive inventory management system built with React, Firebase, and Tailwind CSS to track and manage stock efficiently.
- Live Demo   —   GitHub Repo

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3   **Styling & UI**: Tailwindcss, Framer Motion, Responsive Web Design
State Management: Redux, Context API   **API Integration**: Restful APIs, Axios
Frameworks & Libraries: React.js, React Hooks, React Router, React Hook Form, Material UI, Shadcn UI, i18n
Tools & Version Control: Git, GitHub, CMD, Postman
Methodologies & Practices: Performance Optimization, Cross-Browser Compatibility, UI/UX Principles

Language Skills

Arabic: (Native Or Bilingual Proficiency)   **English**: (Professional Working Proficiency)
